-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: lines 3, "form" should be changed to --from--. Appropriate correction is required.
2. Claim 4 is objected to because of the following informalities: lines 4, after "stationary", --plate-- should be added. Appropriate correction is required

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. It is unclear to the examiner as to what the applicant means by "the projection being formed in the stationary" in lines 3 and 4

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 10-23995.

The JP10-23995 reference discloses a sanitary washing toilet seat device comprising a stationary plate 3 fixed on a rear top side of a toilet bowl 100; and a casing 1 accommodating a washing mechanism, the case being mounted onto the plate 3 in male-and-female connection manner (via a pin 9 and groove 8 connection in Fig. 2b) so as to be movable to a frontward direction of the toilet bowl as shown in Fig. 2c.

Regarding claim 3 as best understood, the male- and female connection is established by a projection 9 and a hole 8 receiving a projection 9, the projection 9 is formed on the bottom surface of the case 1.

Regarding claim 4, the male-and-female connection is established by a convex portion (bottom surface of member 9) and a concave portion 8 receiving the convex portion, the convex portion being formed on a bottom surface of the case 1, the concave portion 8 being formed in the stationary plate 3.

Regarding claim 5, a front side of the concave portion 8 of the stationary plate is expanded in its open area in the upward direction and a front side of the convex portion of the bottom surface of the case is inclined relative to a rear side of the toilet bowl.

Regarding claim 6, the male-and-female connection in inclined (left side of groove 8 moves upward) in frontward direction of the toilet bowl.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Lee, Kondo, Wang and Chomik et al references show washing devices comprising a plate fixed to a toilet bowl and a case accommodating a washing mechanism, the case detachably connected to the plate.
